NMP Registration

Dear customer,

Hitachi Chemical DuPont MicroSystems GmbH (HD MicroSystems), through its parent company DuPont, is pleased to inform you that under the requirements of the European REACH regulations, we successfully registered N-Methylpyrrolidone (NMP, CAS No.872-50-4) in September 2010.

The registration number is: **01-2119472430-46-0004**

Please note that we already have updated the hazard classification on labels and material safety data sheets (MSDS) for all HD MicroSystems' products that contain NMP. As a customer, the key change that you will see is that R61- "May cause harm to the unborn child" is included on the product labels and MSDSs. Updated MSDS are available on request.

Subsequently from 1st December 2010 we will be further modifying the product label of our products VM-651, PA-400R and PA-401D to ensure that they are compliant with CLP Regulation (EC) No 1272/2008 on the classification, labelling and packaging of substances and mixtures. The appropriate MSDS will reflect the new "P- and H-phrases" of that regulation.

If you have any questions please contact Mr. Michael Knaus (Michael.Knaus@dupont.com)

Sincerely,

Michael Knaus
REACH Coordinator
